

TRANSPORT OF DANGEROUS GOODS (ADR/RID)

How can Inerco's services in transport of dangerous goods help you?

Loading and unloading operations as well as transport of dangerous goods must be carried out with the appropriate safety levels in order to avoid damage on people, infrastructure and facilities, staff and environment, as well as to avoid the consequences and media impact that an accident may have.

Having a Safety Adviser with adequate training and experience allows, in addition of complying with legal requirement, to minimize risks and provide the company with the necessary tools for easy management of these operations.

Key benefits

- Compliance with laws and regulations
- It reduces risks and ensure appropriate Safety levels during operation
- Continuous and updated technical advice, focused and particularized to the risks of your industry to better suit your needs.
- It improves the knowledge of the staff about how to manage risk situations
- Correct and safe use of the specific means of action in emergencies

Why INERCO?

- Wide experience and technical capacity for custom-made services
- Integral solutions in engineering, environment, occupational health and safety
- Accurate knowledge of the industry
- Independence, quality, accuracy and reliability
