

EMERGENCY TRAINING

How can Emergency Training help you?

Emergency Training increases your facility's safety level, by getting personal skills, working as a team and by getting knowledge on handling emergency and rescue equipment

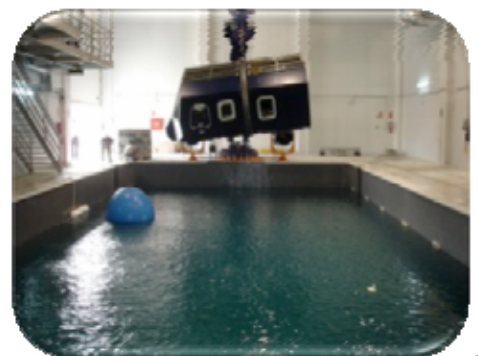

The methodology applied by INERCO is based on international training standards such as NFPA and OPITO, and the training is custom-designed to meet the industry's specific training needs

Key benefits

- Improvement on emergency skills on handling risky situations
- Correct and safe use of specific emergency equipment and resources
- Tailored to meet your company's specific training needs
- Comply with legal requisitions
- Adapted to international standards

Why INERCO?

- Wide experience and technical capacity for custom-made services
- Integral solutions in engineering, environment, occupational health and safety
- Accurate knowledge of the industry
- Independence, quality, accuracy and reliability
- Certified training centers
