

SAFETY MANAGEMENT

How can OH&S Audits help you?

OH&S Audits allow the industry to identify how an organization works and manages all the different aspects of the activity. It also allows the industry to correct hazards and determine the appropriate actions to achieve the desired safety goals.

The works are carried out by a field-audit, based on checking and reviewing of representative sampling for safety issues.

Key benefits

- Verify the design of the protection layers and safety systems
- Verify that the safety regulations are met and that periodic inspections and revision of the installations are carried out
- Verify the SMS implementation
- Verify the suitability and maintenance of the installed fire protection system in terms of its operability in emergency situations
- Verify the implementation of control/mitigation measures identified in the risk analyses

Why INERCO?

- Wide experience and technical capacity for custom-made services
- Integral solutions in engineering, environment, occupational health and safety
- Accurate knowledge of the industry
- Independence, quality, accuracy and reliability

SAFETY MANAGEMENT

Our solutions

- Safety Management System audit
